Dear Sir / Madam

The submissions page says individuals can submit something against this electoral boundary change BUT it says submissions "should" (not may):-

address the relevant factors and the electoral enrolment figures  
provide an alternative option for the Commissioners to consider if possible.

Evidence that you have community support for your alternative option or submission is also desirable.

So really the government doesn't want us to submit anything because they just want more city people in seats, to squeeze out regional people because the government wants to hurt farmers, and make regional issues go away by putting city issues first. This boundary realignment should halve the amount of people in the city and triple the amount of people representing every region outside the metro area.

I object wholeheartedly to the boundary realignment, knowing full well that you don't care what anyone says. You will do what you want to do.

Kind regards

Maria Rebane
